The JV to focus on designing, developing, manufacturing and supplying full cabin-scope related systems and modules

Forvia has entered into a joint venture agreement with Chery to work on smart and sustainable cockpits, it said in a press release dated April 11. The two companies will establish a JV company in Wuhu, mainland China, named Cockpit of the Future. This follows a September 2023 agreement between the companies to deepen all-round cooperation in the field of smart and sustainable cockpits.

The JV will focus on designing, developing, manufacturing and supplying full cabin-scope related systems and modules, including seats, interiors and cockpit electronics, with low CO2 emission materials and processes. It will include a research and development center for industrial design and cockpit integration capabilities. The JV plans to launch two production sites in the first half of fiscal 2024.

“The automotive industry is currently experiencing a technological revolution and smart sustainable cockpit demand is increasing. To stay ahead in this competitive market, we are pleased to further deepen our collaboration with CHERY, a key technology-driven partner. We aim to turn the vehicle cabin into a truly intelligent space, meeting the scenario-based needs of consumers through sustainable and innovative solutions to create a safe, affordable, sustainable and customized mobility experience,” said Patrick Koller, CEO of Forvia.
