**Blink Charging will supply 429 chargers, offering a total of 723 plugs, to support residents of Power Design projects across the US**

Blink Charging Co., a notable provider of electric vehicle charging equipment and services, has entered into an agreement with Power Design Inc., a leading design-build multitrade contractor in the US, to supply EV chargers for select locations. Under this new arrangement, Blink will provide 429 chargers offering a

total of 723 plugs to support residents of Power Design projects across the US. These installations, primarily targeting luxury multifamily apartments and condominiums, will see Power Design owning the Blink charging stations initially, with ownership transferring to the property managers once installed.

This partnership marks a continuation of the decade-long collaboration between Blink Charging and Power Design, highlighting Power Design's emergence as a prominent installer of EV chargers over the past five years. Blink President and CEO-elect Mike Battaglia expressed enthusiasm about joining forces again with Power Design to advance the accessibility and integration of EV charging technology in innovative property developments nationwide. He emphasized Blink's commitment to supporting property developers, contractors and designers in incorporating EV charging solutions into their projects.

Power Design Energy Account Manager Mike Kuhn also shared his excitement about the collaboration with Blink, underscoring the increasing demand for EVs and the corresponding need for accessible, reliable EV charging services in residential areas. He highlighted the enhanced convenience and value these on-site charging facilities would bring to modern living spaces, enhancing the overall resident experience. This agreement demonstrates a shared commitment between Blink Charging and Power Design to promote EV charging accessibility and contribute to the broader acceptance and integration of EV technology in communities across the country.
