Uber integrates Segments.ai to enhance data annotation for autonomous vehicle technology, reflecting strategic growth in AI solutions

Uber Technologies has acquired Segments.ai, a Belgian startup known for its data labeling platform, to enhance the AI capabilities in its autonomous driving technology. This acquisition highlights Uber's commitment to refining its technology for autonomous vehicles. Although the financial terms of the deal have not been disclosed,

Segments.ai will join Uber AI Solutions and contribute to Uber's ongoing efforts in expanding data annotation projects aimed at improving its lidar and multisensor technologies.

Uber Technologies, a technology provider, connects riders with drivers, hungry individuals with restaurants and food couriers, and shippers with carriers via its on-demand platform. This technology is utilized by traditional and autonomous vehicles but has potential for other products and services, such as drone deliveries or electronic vehicle take-off and landing (eVTOL) technology. Uber operates in over 70 countries, boasting over 180 million users who engage with its services at least once a month.

The company, with a market capitalization of \$201.47 billion, has established a notable presence in the technology sector, specifically within the software industry. Its expansive global reach and innovative service offerings strengthen its strategic market position. Uber's financial performance showcases impressive revenue growth of 30.5% over the past three years, supported by a net margin of 26.68%, indicating robust profitability.
