**Funding from Honda Xcelerator Ventures will help Nexeon scale production up and enhance high-energy-density materials for next-generation electric mobility and energy storage**

Nexeon announced that Honda Motor Co. Ltd. (Honda) has become a strategic investor in the company through Honda's global open innovation program, Honda Xcelerator Ventures. The announcement, made from Oxford, UK, on May 28, 2026, describes this new investment as a significant milestone that reflects confidence in Nexeon's technology and its potential role in the future of high-performance energy storage.

The funding will support Nexeon's continued growth and the advancement of its silicon anode materials, which are described as enabling higher energy density and improved battery performance for electric mobility and other applications. The company states that it has made significant progress in the development of advanced silicon-carbon materials, pushing the boundaries of what is possible in next generation battery performance.

According to Nexeon, its silicon anode technology is a cornerstone of next-generation energy storage, and Honda's investment will support the development of this critical technology.

Dr Scott Brown, CEO of Nexeon, said that the company is pleased to welcome Honda as a shareholder as it enters an exciting phase and commercializes its technology, and that Nexeon looks forward to collaborating closely with Honda and other partners as it scales production up. He added that this funding round is a validation of Nexeon's technology and commercial traction, as well as an endorsement of the strategic role the company can play in the global transition to electrification.
